

COVID-19 Vaccination Schedule*

Vaccine	0 month	1 month	2 month	3 month	4 month	5 month	6 month	7 month
Pfizer-BioNTech (ages 5-11 years)	1st Dose	2nd Dose (3 weeks after 1 st dose)						
Pfizer-BioNTech (ages 12 years and older)	1st Dose	2nd Dose¹ (3–8 weeks after 1 st dose)					Booster Dose² (at least 5 months after 2 nd dose)	
Moderna (ages 18 years and older)	1st Dose	2nd Dose¹ (4–8 weeks after 1 st dose)					Booster Dose² (at least 5 months after 2 nd dose)	
Janssen (ages 18 years and older)	1st Dose		Booster Dose² (at least 2 months after 1 st dose)					

Note: Timeline is approximate. Intervals of 3 months or fewer are converted into weeks per the formula “1 month = 4 weeks.” Intervals of 4 months or more are converted into calendar months.

* See Guidance for COVID-19 vaccination for people who are moderately or severely immunocompromised for schedule for people who are moderately or severely immunocompromised.

¹ An 8-week interval may be optimal for some people ages 12 years and older, especially for males ages 12 to 39 years. A shorter interval (3 weeks for Pfizer-BioNTech; 4 weeks for Moderna) between the first and second doses remains the recommended interval for: people who are moderately or severely immunocompromised; adults ages 65 years and older; and others who need rapid protection due to increased concern about community transmission or risk of severe disease.

² An mRNA COVID-19 vaccine is preferred over the Janssen COVID-19 Vaccine for booster vaccination of people ages 18 years and older. For people ages 12–17 years, only Pfizer-BioNTech can be used. People ages 5–11 years should not receive a booster dose.

COVID-19 Vaccination Schedule

For Those who are Moderately or Severely Immunocompromised

Vaccine	0 month	1 month	2 month	3 month	4 month	5 month	6 month	7 month
Pfizer-BioNTech (ages 5-11 years)	1 st Dose	2 nd Dose (3 weeks after 1 st dose)	3 rd Dose (At least 4 weeks after 2 nd dose)					
Pfizer-BioNTech (ages 12 years and older)	1 st Dose	2 nd Dose (3 weeks after 1 st dose)	3 rd Dose (At least 4 weeks after 2 nd dose)			Booster Dose ¹ (at least 3 months after 3 rd dose)		
Moderna (ages 18 years and older)	1 st Dose	2 nd Dose (4 weeks after 1 st dose)	3 rd Dose (At least 4 weeks after 2 nd dose)			Booster Dose ¹ (at least 3 months after 3 rd dose)		
Janssen (ages 18 years and older)	1 st Dose	2 nd (Additional) Dose ² using an mRNA COVID-19 Vaccine (At least 4 weeks after 1 st dose)		Booster Dose ¹ (at least 2 months after additional dose)				

Note: Timeline is approximate. Intervals of 3 months or fewer are converted into weeks per the formula “1 month = 4 weeks.” Intervals of 4 months or more are converted into calendar months.

¹ An mRNA COVID-19 vaccine is preferred over the Janssen COVID-19 Vaccine for booster vaccination of people ages 18 years and older. For people ages 12–17 years, only Pfizer-BioNTech can be used. People ages 5–11 years should not receive a booster dose.

² Only Pfizer-BioNTech or Moderna COVID-19 Vaccine should be used. Visit [Appendix B In the CDC Interim Clinical Considerations](https://www.cdc.gov/media/releases/2021/s0810-covid-vaccine-immunocompromised.html) (bit.ly/CDCJanssenImmuno) for more information on vaccinating people who are moderately or severely immunocompromised and who received Janssen COVID-19 vaccine for the primary series.
